

Cisco TelePresence EX Series EX90 and EX60

November 2010

Personal TelePresence for the desktop

Work, connect,
collaborate

Share Naturally

So Simple

Cisco EX Series

Personal TelePresence for the desktop

Cisco TelePresence EX60

Cisco TelePresence EX90

Work, connect and collaborate from your desk...all at the touch of a finger

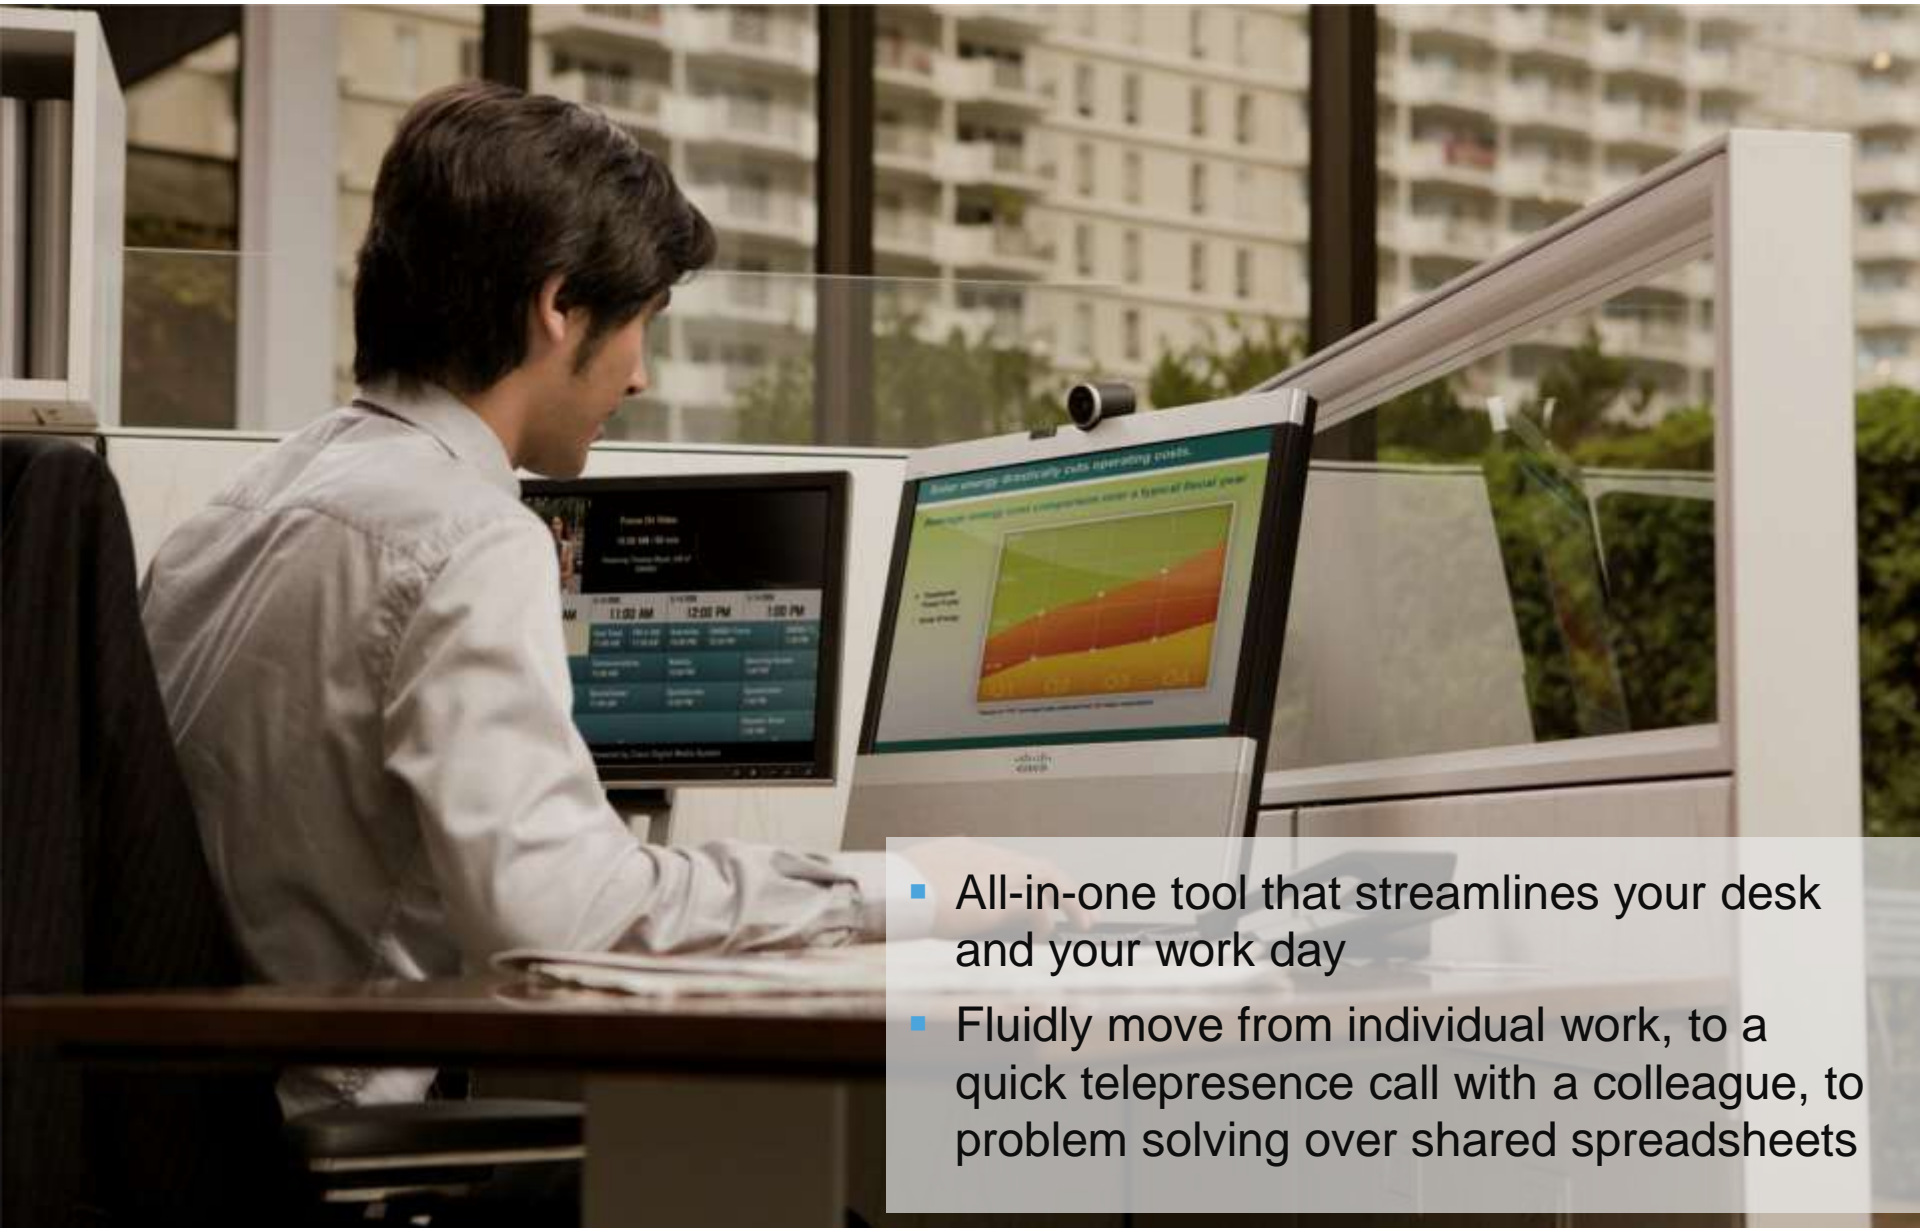

All in one work and collaboration tool

Amazing face-to-face communication

Simple and intuitive user interface

Unmatched natural content sharing experience

Work, connect, collaborate

- All-in-one tool that streamlines your desk and your work day
- Fluidly move from individual work, to a quick telepresence call with a colleague, to problem solving over shared spreadsheets

Share naturally, as if you're in the same room

- See people clearly with true-to-life 1080p HD video on a large 24 or 21.5" screen
- Fluidly share materials with everyone in clear detail with HD content sharing
- Quick flip of the camera and you have an instant HD document camera

So simple

- A glide of the finger to make and manage calls with Cisco TelePresence touch screen
- Intuitive control with clear, context-sensitive functions

Features & benefits

Cisco TelePresence EX60

- 8" Cisco TelePresence touch screen for simple control
- 1080p30 and 720p60 video resolution for the telepresence experience at the desk
- High quality 21.5" PC screen with clear 1920 x 1080 resolution enables a seamless, one-tool desktop
- PrecisionHD™ camera ensures video clarity and optimal field of view
- 2 front speakers for excellent quality audio
- WXGA/720p content sharing with transparent one-touch and a built-in document camera feature to easily share physical documents and objects
- Share your laptop content easily through a digital input (DVI)
- Included wideband handset or add a headset input for privacy
- Wall mount capable with select VESA brackets
